- 1/2" Serrated Cutting Edge
- 2 Year Warranty

OPTIONS:

- Universal Quick Attach Carrier
- Global Carrier

SIZES:

- 78" ■ 84" ■ 91"

The Stinger Attachments RTG-XD Series Root Grapple is designed for larger horsepower machines. This utilizes 1/2" material throughout with a 6" tine spacing to capture large debris. This bucket features a flat-tine design that works well to get under debris. The open side design allows the operator to secure and move longer debris. This grapple is fitted with 2 grapples that operate independently to confidently secure an uneven load. This grapple is built with the strongest backbone in the industry, featuring a 1-piece tine design that is welded around a 3"x 3" lower backbone. This design adds considerable strength and life over the more common 2-piece welded tine utilized in most other brands.

PROPER BLAST REQUIRED
